Geoff Rapson  
 Lauren Stevens

### 4. Western Coal Services (WCS) & Lidsdale Siding (LS)

Overview of WCS and LS operations and activities per the attached presentation.

Raised by	Comment/Question	Response(s)
MS	Clarification on the Stemlar feeder.	The stemlar feeder is a chain conveyor unit that feeds adjustable rates of coal products into the coal supply conveyor system loaded via FEL (a mini-conveyor coal feeder).  This stemlar feeder will be installed on site at the main ROM Coal stockpile feeding directly into MPPS via OL3 to blend existing coal on site with long wall coal to improve product stewardship outcomes and coal quality outputs.
DW	Raised the placement and wording of the plaque to commemorate King Walters.	JM and NT to meet with DW to clarify and bring the matter to a resolution.

### 5. Angus Place

Overview of Angus Place operations and activities per the attached presentation.

Raised by	Comment/Question	Response(s)
JS	Clarification of location of rehabilitation to be undertaken at the Vale of Clywdd site.	Location is Vale of Clywdd No. 2. Update presentation to confirm location is part of the Angus Place rehabilitation. .

### 6. Springvale Coal

Overview of Springvale Coal operations and activities per the attached presentation.

Raised By	Comment/Question	Response(s)
HF	Question is relation to the recent NSW Court of Appeal finding in favour of 4 Nature appeal of the Springvale Consent.	BN provided an overview of the current status of the courts decision which ruled that the PAC applied the wrong test in determining Springvale's impact in the Sydney Drinking Water Catchment.  The court did not invalidate Springvale's consent

Raised By	Comment/Question	Response(s)
		therefore can continue operating until the court hears further arguments by the parties.  The workforce has been briefed on the matter and will be kept informed in relation to progress.

## 7. Modifications and Project Updates

### 7.1 Springvale Coal Services: Proposed Modification to State Significant Development (SSD) consent 5579.

NS provided an overview of proposed Modification per the attached presentation. In summary the Modification elements include:

- An increase in the amount of ROM coal that can be received by the Project from Springvale Mine from the approved 4.5 Mtpa to up to 5.5 Mtpa on the overland conveyor
- The establishment of a dedicated product coal stockpile of 80,000 tonne capacity in the vicinity of the coal preparation plant
- An increase in the workforce from the approved 18 FTE personnel to 25 FTE personnel
- A revision in the application of noise limits in SSD 5579 (Schedule 3 Condition 9) to the Project components.

Raised By	Comment/Question	Response(s)
	General discussion about the approval process and whether the Project will require a PAC hearing.	NS outlined the approval process and triggers for PAC hearing.

### 7.2 Springvale / Energy Australia Water Treatment Project Update and Regis proposal to utilise mine water for McPhillamys Gold Project

DR provided an overview of Projects per the attached presentation.

Raised By	Comment/Question	Response(s)
	General discussion about who will manage the approval process and positive outcome for water management in the area.	Regis to manage the approval process

### 7.3 Springvale Stand-down Research Project

JM provided an overview of the Stand-down Research Project per the attached presentation

Raised By	Comment/Question	Response(s)
JL	Can the presentation and report be provided to the school parent's body?	JM encouraged the dissemination of the report and its findings to articulate the impact of the stand-down on people in the community.
